A MESSAGE FROM OUR CEO

Established in 1789 in Hanau, Germany, we are the world's oldest diamond company with a wealth of heritage and know-how.

Today, Backes & Strauss is part of the Franck Muller group, a Swiss watchmaking company daring to imagine the future of precision Swiss horology. Our partnership is a meeting of masters, resulting in masterpieces of horology in every detail.

Our story has been one of passion, determination and unrivalled craftsmanship in the pursuit of excellence.

Our mission remains to be the quintessential jewellery timepiece creator, all the while staying true to our four core values; excellence, beauty, innovation and sustainability.

Vartkess A. Knadjian
CEO, Backes & Strauss

MASTERS OF DIAMONDS SINCE 1789

Every round, brilliant diamond used at Backes & Strauss is an Ideal-Cut diamond, designed to emanate optimum fire and brilliance. The perfect symmetry and proportions of an Ideal-Cut diamond ensure that the light entering the stone refracts internally from 57 precisely placed facets and travels out through the top of the diamond, creating a mesmerising sparkle.

The ultimate test of Backes & Strauss expertise in diamond-cutting is the presence of the Hearts & Arrows motif in a diamond when examined with a Hearts & Arrows viewer.

During hundreds of hours of meticulous planning, precision cutting and hand-polishing by Backes & Strauss diamond experts, a natural stone makes the way from its rough form to a final polished brilliant diamond often losing up to 60 percent of its original weight in the process.

As testament to our dedication to perfection, every Backes & Strauss watch comes with its own Hearts & Arrows viewer.

MEETING OF MASTERS

Backes & Strauss and the Franck Muller Group are masters of the art and science of their respective crafts; one of diamonds and the other of complications.

While Backes & Strauss is occupied with light and Franck Muller is concerned with time, both share a devotion to mathematical precision.

The dial and the case of a Backes & Strauss watch reflects the geometric symmetry of the Ideal-Cut diamond. Within the beating heart of the watch, the elaborately crafted movements convey a jewel-like beauty.

The result of this meeting of masters is a collection of timepieces so intricate, they are veritable masterpieces both inside and out.
